**RE: NET METERING AND INTERCONNECTION
SEMI-ANNUAL REPORTS
N.J.A.C. 14:8-4.5 and 5.9**

Dear Secretary Izzo:

Attached please find the above-referenced report for the period January through June 2014 data.

Very truly yours,

A handwritten signature in blue ink that reads "Alexander C. Stern".

**Public Service Electric and Gas Company
Net Meter Report
January 2014 - June 2014**

System Added	kW Generation Ratings Solar	kW Generation Ratings Wind	Total					
			kW Generation Rating	Number of Solar Systems	Number of Wind Systems	Total Number of Systems		
January	2,550.00	0.00	2,550.00	210	0	210	Don Cooke/ Bob Fecht/	Mike Henry Chris Honey

1. This represents the number of systems. A single customer may have multiple systems.

2. The monthly estimated solar generation is based on the total generation rating of systems installed and activated by the end of each month during the reporting period times the solar array's inverter estimated efficiency (80%) * 4.5 (NREL's average hours of sunlight per day for New Jersey) * calendar days for month. This Formula is based on an annual standard used in other Company Jurisdictions. Note that this estimate does not take into account the variations in the site-specific installation details, such as array orientation, tracking devices and obstacles that can cast a shadow) and/or panels that fail to meet the manufacturer's minimum output rating. It also does not take into consideration that the average hours of sunlight per day may differ for different months. (b*.8*4.5*a).

3. The estimated kilowatt hours delivered to the customer-generator through the distribution system is calculated by taking the customer-generator energy supplied to the distribution system plus the customer-generators' actual consumption either positive or negative for the billing months during the reporting period.

* Anniversary Credit Amount and Number of Accounts who received Anniversary credit information for June will be available after July Billing Cycle is completed.
